Hi Beth:	
	sey Barton. She's the attorney assigned to the BP release. I'm sure she'll be able to with the questions you have.
Best,	
Nicole Ca	antello

I saw a press release that the coast guard said there was no more oil in Lake Michigan and on the shoreline from the BP release and that the booms are starting to be removed. Do we know whether they checked the floor of Lake Michigan for oil that may have sunk? I'm thinking about what happened in Marshall, Michigan (Kalamazoo river) – the pipeline carried tar sands oil (unbeknownst to USEPA), and the material had sunk to the river bed. Obviously the booms did not and do not address this pollution. If you're not involved, will you direct me to who is? Thanks much. Beth Elizabeth Wallace, Chief
